

NIGHT LIGHT WITH SPARKLE AND GLITTER

ABSTRACT OF THE DISCLOSURE

A night light that includes liquid and glitter particles therein is illuminated by the light. The night light includes a base having two leads for coupling to an electrical wall outlet and a light bulb coupled with a base. A container includes the liquid and glitter therein and is coupled to the base. At least the container is made of a heat resistant plastic. Light from the light bulb illuminates the liquid and thereby heats the liquid causing currents therein, which move the glitter particles.
